

Make Flash
non-writable

WRP (Write Protection)
(irreversible!!!)

? What if they hack bootloader?

? Signed image bootloader?

SRAM DMA regions

- make RW+XN (execute
never)

AXI-SRAM1-SRAM2-SRAM3-SRAM4

m.b. DTCM (try to fit all code into ITCM)

explore ways to keep **ITCM** R+X after
setup/copying code to RAM (reprogram **MPU**)
